The map shows the percentage of students in grades 6-12 who were above the state median of a composite score that reflects student self-reporting of behaviors associated with ACEs. The measures considered in the composite score are from the Georgia Student Health Survey (2019) and are related to the behaviors - bullying, fighting, substance use, anxiety/depression, and self-harm.

A higher percentage represents a greater rate of students in grades 6-12 reporting behaviors that have been associated with ACEs or that are ACEs.

UNDERSTANDING THE ACE COMPOSITE SCORE

The map shows the percentage of students in grades 6-12 who were above the state median of a composite score that reflects student self-reporting of behaviors associated with ACEs. The measures considered in the composite score are from the Georgia Student Health Survey (2019) and are related to the behaviors - bullying, fighting, substance use, anxiety/depression, and self-harm.

The measures considered in the composite score are from the Georgia Student Health Survey (2019) and are related to the behaviors - bullying, fighting, substance use, anxiety/depression, and self-harm.

A higher percentage represents a greater rate of students in grades 6-12 reporting behaviors that have been associated with ACEs or that are ACEs.

LEADING CONTRIBUTORS TO THE ACE COMPOSITE SCORE BY COUNTY
